

WHAT ARE MY BENEFITS FOR USING MED-SYNC

Patients who opt in to Medication Synchronization here at our pharmacy will likely average more than 100 additional days on therapy per year and are 30 percent more likely to take their medication as prescribed (or to be "adherent") than patients not enrolled in a synchronization program.

- All your prescriptions are ready on the same day each month.
- All prescriptions are automatically re-filled for you without any action on your part. It's easy & a free service for our patients!
- Our pharmacist conducts a monthly review of your medications and sets up a consultation with you if necessary.
- New prescriptions are automatically included in your monthly medication supply after the initial prescription is filled.
- Our pharmacy staff communicates with you in advance, to remind and confirm your prescription(s) ready date.
- The process repeats itself every month, automatically.
